Asking for finance help is not always easy. You're never sure if anyone will understand your situation or if you are going to end up being one of the many people just waiting for a response.

At Max Loans we understand what it's like to need a loan. In fact, it's why we set up our business in the first place – to provide you with the money you need from people who actually understand your situation and will treat you like a person rather than a problem.

You see we act as a broker, working on your behalf with one of our many lenders. What this means is that we can source the best loan to suit you and your situation. There's no need for you to approach a variety of lenders and tell your story five different times. Plus, by us having a pool of lenders to talk to, your chances of approval are higher.

Of course everyone's situation is different and sometimes this means we can't get you exactly what you want. But even here we will get you either the best we can or tell you what you need to do to improve your future loan application.

So if you're looking for someone who will listen and work as hard as they can on your behalf to get you the money you need, then give us a call. We are here to help.

Collingridge And Smith Architects

An award-winning international architectural practice delivering beautiful human spaces that are unique, innovative and sustainable.

Phil and Tiffany Smith established the practice in 2007 and Graham Collingridge joined in 2012. The company carefully integrates architectural, landscape, interior and furniture design skills to ensure projects achieve an holistic integrity that meets our client's needs.

Our New Zealand and United Kingdom offices design and deliver projects ranging from refurbishments to new-builds; from domestic scale to urban master plans; from conception to completion. Our experience covers a broad range of typologies – masterplans, mixed-use schemes, residential; offices; cultural; educational; healthcare and childcare.

We work with a diverse client base, including developers, private, government and charities and have experience of working with multiple stakeholders on challenging sites around the world.
